

## **Be in the know for clearing snow:**

- Keep streets clear of cars, basketball goals, etc. to allow for snowplow access. Clear snow away from your mailbox so your mail can be delivered.
- Place garbage and recycling totes at the foot of your driveway.
- Shovel snow from your driveway & sidewalk into your yard, not the street. Your kids (and snowplow drivers) will love you for it.
- Yield to snowplow drivers as they are emergency vehicles with a limited field of vision.
- Please be patient. Main roads and streets are plowed first, then neighborhoods. Cul-de-sacs are plowed last because they take the most time and have the least traffic.
